Ancient Greek Philosophy: Pre-Socratics, Sophists, Socrates, Plato, Aristotle

Ancient Greek Philosophy

Ancient Greek philosophy is the philosophical tradition of the ancient Greeks, beginning with the pre-Socratic philosophers and continuing through the Classical period, the Hellenistic period, and the Roman period. Ancient Greek philosophy was a rational and critical tradition that sought to understand the world and the place of human beings in it. It was also a tradition that was deeply influenced by religion and mythology.

Ancient Greek philosophy is divided into three periods: the pre-Socratic period, the Classical period, and the Hellenistic period. The pre-Socratic period is the period of the early philosophers who were active before the time of Socrates. The Classical period is the period of the philosophers who were active during the time of Socrates, Plato, and Aristotle. The Hellenistic period is the period of the philosophers who were active after the time of Aristotle.
